

ENHANCING INTERCULTURAL LEARNING THROUGH EDUCATION ABROAD – A WORKSHOP FOR FACULTY AND STAFF

November 5, 2021, 8:30 AM - 4:00 PM

The Inn at Virginia Tech

Sponsored by the Virginia Tech Department of Sustainable Biomaterials, College of Natural Resources and Environment, and the Global Education Office.

In an increasingly globalized and complicated world, intercultural competency is critical. Intercultural competence stems from learning in many forms, one of the most powerful of which is education abroad. This workshop will help participants to develop strategies and activities to increase student intercultural learning in all courses but especially those that involve short-term education abroad. Participants will end the day with a better understanding of how to facilitate intercultural learning and with specific strategies that can be used in their courses.

This workshop will be led by Steven Duke. Dr. Duke is Associate Vice President at the University of Nebraska System, and President of the Institute for Cross-Cultural Teaching and Learning.

Please contact with your questions: Robert Bush (rbush@vt.edu) or Tom Hammett (himal@vt.edu)

Registration: The workshop registration page can be found at register.cpe.vt.edu or accessed directly using the QR code below. The registration fee is US\$250. However, the first 10 Virginia Tech registrants will receive a US\$150 scholarship provided by the VT Office of Global Education.
